About Me

I am a **mid-level full-stack** developer with **2+ years** of hands-on experience delivering scalable web applications using Next.js, TypeScript, Spring Boot, and Laravel. I have a proven ability to design secure backend systems, implement clean and maintainable frontend architectures, and structure efficient database schemas.

I actively participate in code reviews, adhere to development best practices, and support junior developers in refining their core programming fundamentals.

Technical Skills

- **Languages:** JavaScript(ES6+), TypeScript, Java, PHP, HTML5, CSS3
- **Frontend Frameworks & Libraries:** React, React Native, Redux, Axios, i18n
- **Backend:** Node.js, Spring Boot, Laravel, RESTful API Design, JWT/OAuth Authentication
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, GitHub, GitLab, Postman, ESLint, Prettier, Vercel

Professional Experience

ICT Star Group Myanmar Co., Ltd. – Junior Software Developer

April 2022 - April 2024

- Developed and maintained production web applications supporting internal business operations using **React.js**.
- Assisted in the backend development using **Laravel** and **Spring Boot**.
- Built a cross-platform mobile application using **React Native**.
- Collaborated with cross-functional teams to design and implement new features.

School Projects

Project Management System (Desktop Application) – October 2025

Tech Stack: Java, JavaFX, MySQL

- Led a team in designing and developing a desktop-based Project Management System.
- Architected **role-based access control** and secure authentication mechanisms.

- Designed relational database schema in MySQL for task tracking, project workflows, and user management.
- Implemented modular JavaFX UI with clean separation of concerns.
- Ensured maintainable code structure and enforced coding standards across the team.

Yukai - Social platform (Web Application) – December 2025

Tech Stack: React.js, Socket.io, PHP, MySQL

Live: <https://yukai-social.vercel.app>

- Led development of a **real-time** social networking platform focused on secure communication and performance.
 - Designed and implemented token-based authentication (JWT) and backend security best practices.
 - Built a **real-time** chat system and **live notification** features using WebSockets (Socket.io).
 - Designed and implemented client-side **End-to-End Encryption (E2EE)** using secure key exchange mechanisms to ensure message privacy and server-side data confidentiality.
 - Developed reusable React component architecture for scalable UI.
 - Optimized frontend performance by reducing unnecessary re-renders and improving API response handling.
 - Structured secure backend APIs in PHP with proper validation and authorization controls.
-

Education & Certifications

Bachelor of Engineering (Incomplete – 3rd Year, 1st Semester)

Technological University (Hmawbi) (2017 - 2020)

Diploma in System Creator Course

Metro IT & Japanese Language Centre (2024 - 2026)

Fundamental Information Technology Engineer Exam (ITPEC)

April 2025

Languages

- **Japanese** - N2 (Nat-Test), N3(JLPT)
- **English** - Conversational
